Sample letter of purpose for completing a master's study

.....:To Mr

After greetings and peace..

I submit to your Excellency the acceptance of my request to join your esteemed university in order to complete my master's study.

The reason for this is my strong desire to complete the study because of my great love for science, as well as the excellent scientific reputation of the university.

I am sure that it will add a lot to me and give me more useful knowledge that will benefit me in the future in my career and work.

I studied at university and got a certificate with grade, and knowing that knowledge benefits its owner, I did not suffice with university studies only.

And I joined an external academy, and I also worked on many scientific projects, the most prominent of which is, and I attended many seminars. I am currently working in a company, and I desire to achieve more successes in My scientific and professional life.

I have enclosed with my letter (CV), which contains more detailed data, and I hope that you will approve my application and accept my enrollment in the university and complete my master's degree at the university.

With my respect and appreciation.
